## Introduction:

### Objectives:

This document is to help customers download and install Project Complete on a Windows operating system. This document can be used for either the marking or planning software.

### Requirements:

This software requires one of the following operating systems.

- Microsoft Windows 7 (32/64-bit)
- Microsoft Windows 8 (32/64-bit)
- Microsoft Windows 8.1 (32/64-bit)
- Microsoft Windows 10 (32/64-bit)

## Procedure:

### Download the software

1. Open a web browser and enter the following URL
  - o <https://www.phoenixcontact.com/printers>
2. Click on the Project Complete hyperlink

#### Printer resources

4. Select the software you wish to download – note the difference between Marking and Planning software.

Software			
	Description	Language	Revision
<input checked="" type="checkbox"/>	[zip, 129 MB] <a href="#">Software</a> PROJECT complete MARKING  SHA256 Checksum: dbb37d174cf37cd01618483d0cb48f91ed37c539c831555386e23867260a718a PROJECT_complete_marking_1.4.9282.zip	International	1.4.9282
<input type="checkbox"/>	[zip, 948 MB] <a href="#">Software</a> PROJECT COMPLETE PLANNING  SHA256 Checksum: 657222ee0ed7e329410ff56bfff1f7e5a67ca835ee1105c01868f7904c55828 PROJECT_complete_planning_1.4.2338.zip	International	1.4.2338

5. Scroll to the bottom of the webpage and select download. Download the zip file to the downloads folder. Since this is a zip file, please do not select the “Open with windows explorer”.

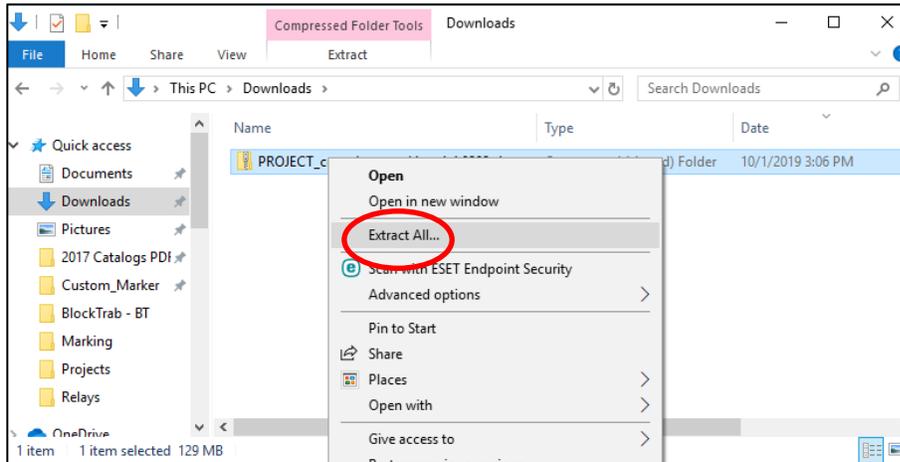

The image shows two parts of a user interface. On the left is a webpage section for downloading software. It features a table with two rows. The first row, representing the 'MARKING' software, has a checked checkbox. Below the table are buttons for 'Download' and 'Add to my downloads'. A note says 'Select the items you want and click "Download" to download them as a single package.' At the bottom of the page are links for 'Create PDF', 'Send by Email', 'Feedback', and 'Share', along with a footer containing '© 2019 PHOENIX CONTACT' and other links.

On the right is a Firefox file dialog box titled 'Opening PROJECT\_complete\_marking\_1.4.9282.zip'. It displays the file name and its type as a 'Compressed (zipped) Folder'. Under the heading 'What should Firefox do with this file?', the 'Save File' option is selected with a radio button. There are also options to 'Open with Windows Explorer (default)' and a checkbox for 'Do this automatically for files like this from now on.' 'OK' and 'Cancel' buttons are at the bottom right.

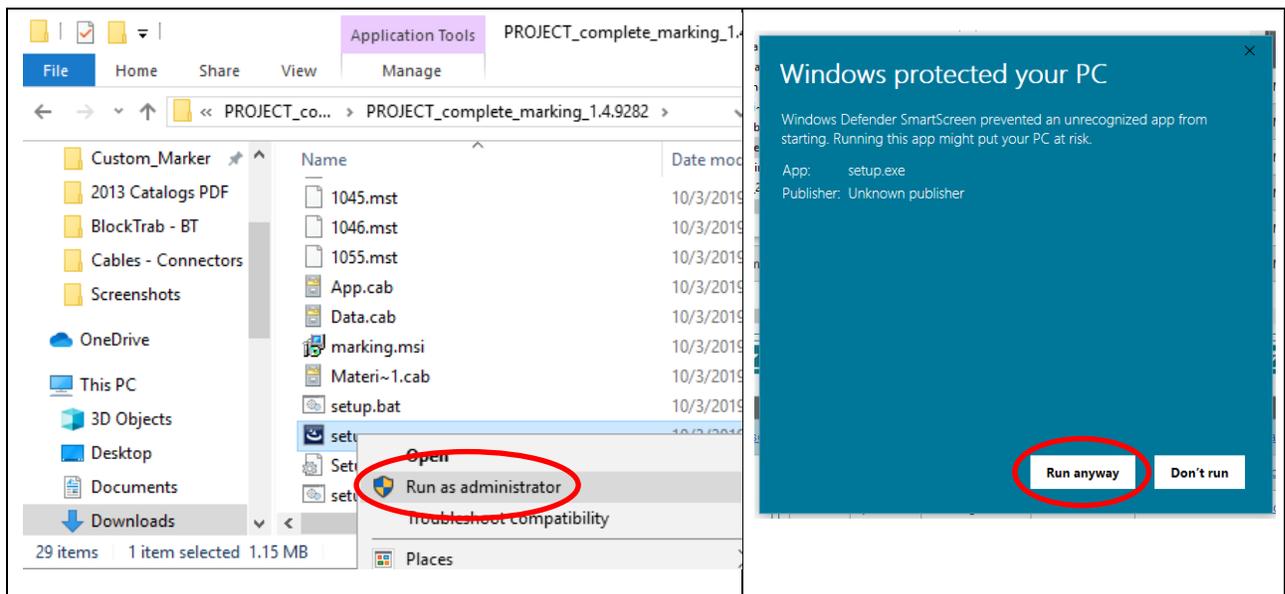

## Extract the zip files

1. Locate the file in Windows file explorer, right click on the file, and select “Extract All”. Windows 7 is capable of unzipping files natively however you may be best off downloading a 3<sup>rd</sup> party application designed to extract compressed folders.

## Install the program

1. Locate the folder for the extracted files. Most times Windows will either open this folder automatically or ask if you want to open this folder via a prompt. Right click on the setup.exe file and run this file as an administrator. Windows may prompt you for permission to install this, click on Run anyway.

## Register Project Complete

1. In your web browser type or copy and paste the following website:
  - <https://www.phoenixcontact.com/project-complete>
2. Scroll to the bottom of the page and select the hyperlink for registering the software.

The planning and marking software PROJECT complete is available as a free download.  
Experience the intuitive way of implementing your project!

To the software download

The download includes a demo version of the PROJECT complete software.

Please use the following link to register for the full version: [Register](#)

After registration, we will send you an e-mail with your validation key for activating the full version.

## Conclusion

If additional support is needed on installing the software or if you feel this guide is missing information that would be useful, please send an email or call into technical service at the following contact information.
